

915 - PINNACLE PELLET, Williams Lake, B.C.

The Pinnacle Renewable Energy Group, the longest established wood pellet producer in Western Canada, chose an XXP Series 100 MegaDome[®] for receiving, storage and transfer of the biomass bulk materials required to produce their premium

softwood pellet fuel. The building is constructed on an engineered, 5-block high (12'-6 overall height) Lock-Block[®] wall. The exclusive MegaDome motorized continuous ridge vent provides controlled ventilation.
