

Northcoast Lumber

3561 | CHILLIWACK, BC | XP 80x120 | INDUSTRIAL

Building for a Better Future— Northcoast Building Products, a trusted supplier of high-quality building materials since 1954, has experienced significant growth, necessitating an expansion into the Fraser Valley. As their operations broadened, the critical need for additional dry storage became paramount to protect valuable wood products from the elements and maintain their quality. A MegaDome® structure emerged as the ideal solution.

These pre-engineered buildings offer exceptional weather protection, maximize storage capacity, ensure easy access for lumberyard operations, and are renowned for their durability and cost-effectiveness. The strategic implementation of a MegaDome® in the Fraser Valley provides Northcoast Building Products with the optimal infrastructure to support its continued expansion and commitment to product integrity.
