Supporting the Future of Mechanical Construction

For more than 40 years, Pitt Meadows Plumbing & Mechanical Systems has grown from a family-run business into one of British Columbia's leading mechanical contractors, delivering complex projects through skilled trades, innovation and off-site fabrication. As operations expanded, PMP required

dependable space to protect and organize equipment and raw materials. MegaDome by BuildWorks delivered an 8,000 sq. ft. clear-span storage structure, measuring 50' wide x 160' long and installed on two rows of concrete blocks. Five overhead doors—two at the front, one at the rear and two in the side wall—provide efficient access and flexibility for daily operations.
